Cornèr remains Switzerland's most solid bank in 2018

According to statistics published by *The Banker* in July 2018, Cornèr Bank is number one in Switzerland in terms of capital soundness for the fourth consecutive year.

This award from the prestigious English financial magazine, which is published by the Financial Times Group and which analyses and compares the balance sheet data of the world's top 1,000 banks, is of paramount importance to Cornèr Bank, which has retained its leading position in the list since 2015.

Maintaining this position at the very top of the list of Switzerland's most solid banks affirms the effectiveness of the management and capital endowment policy pursued by the Lugano-based financial institute since 1952.

This financial stability will allow Cornèr Bank to continue investing strongly to improve and expand the range of products and services, both digital and offline, that it offers to its clients. Indeed, client numbers at the Bank have experienced strong growth in recent years, both in Switzerland and abroad.

With this healthy relationship between growth and investments, Cornèr Bank can look to the future with confidence and optimism.
