## **CornèrTrader expands its range of cryptocurrency services**

**Following the successful launch of its Bitcoin Trackers in September, CornèrTrader is expanding its range of cryptocurrency services through the addition of new products, called Ethereum Trackers.**

Like Bitcoin Tracker One and Bitcoin Tracker EURO, the **Ethereum Tracker One**, quoted in SEK, and **Ethereum Tracker EURO** are Exchange Traded Notes (ETNs) of recent issue that reflect the movement of the Ethereum (ETH) against US dollar (USD). They are both traded on the Nasdaq OMX (Stockholm).

With these instruments, clients will be able to invest in Ethereum without taking over either the obligation or the risk of owning them and hence minimising cybersecurity and storage risks.

**Ethereum Trackers** are immediately available on the CornèrTrader platform.
